

It is with great pleasure that we announce the launch of **the very first** Canadian Green Bond Fund.

ALPHAFIXE
GREEN
BOND FUND

JANUARY 2018

AlphaFixe
Capital

It is with great pleasure that we announce the launch of the very first Canadian Green Bond Fund.

The AlphaFixe Green Bond Fund started on November 21st, 2017. One of the main features of this fund is to offer a risk profile comparable to the Canadian bond market, but through investments in global green bonds.

This fund offers an innovative solution for active bond management, making it possible to participate in the energy transition, without diminishing performance objectives. Fixed income securities are mainly intended to finance climate change mitigation and adaptation projects.

The selected investments must comply with the green bond selection criteria established by AlphaFixe Capital's proprietary validation process, AlphaGreen. These criteria are based in particular on the Green Bond Principles and the Climate Bonds Initiative standards.

We are proud to actively participate in the development of a low-carbon economy while providing innovative, responsible investment solutions that meet the needs of our partners/clients.

AlphaFixe Green Bond Fund currently has over \$ 40 million in assets under management from two major partners, Bâtirente and Fondation. Other investors have already confirmed new investments in this fund, which will total more than \$ 100 million in assets under management at the end of March 2018.

For more information, do not hesitate to contact us.

Sincerely
AlphaFixe Capital team
